---

Dear all Primary Care Physicians (PCP),

With our continued efforts of treating diabetes in a more effective and efficient way, please see the link below for the important diabetes resource. There are various resources within the website that we can use in order to help us to better understand the disease, and to better treat the disease.

<http://ndep.nih.gov/index.aspx>

The link provides a new September issue, which contains information for your patients on **how to manage and understand their diabetes**. In addition, there are various resources that can help with our RAF Score and HEDIS measures associated with diabetic diseases, as mentioned by the **PPOD Toolkit and Webinar** by the website for **Podiatry and Optometry/Ophthalmologists** to further utilize.

Attached to this memo is a **HCC Coding Summary sheet** that is extremely useful for accurately coding for each patient's Risk Adjustment Factor Scoring. Please note that there are various categories listed, including diabetes.

Please also feel free to give us a call if you still do not have the **HEDIS/STAR Ratings Program** for Central Health Plan, Easy Choice, or Brand New Day. We will be glad to send it your way, as the deadline for Star program submissions are the end of this year.

Thank you and please do not hesitate to call if there are any further questions.
