Dear all Primary Care Physicians (PCP),

Please take some time to review the website directed below to access information on various resources for your older adult patients that may be facing or at risk for diabetes. There are various training and resource modules in regards to managing diabetes, preventing type 2 diabetes, helping those affected by diabetes, and links to additional health care professionals.

Please refer to the directions below to access the free training.

1. Access the website by going to: <http://ndep.nih.gov/older-adults/>
2. Navigate and click on various resources listed on the website, as shown below:

Diabetes Resources for Older Adults

Diabetes occurs in people of all ages, but it's more common in older adults. The National Diabetes Education Program offers access to a range of resources that can help older adults learn how to better manage their diabetes or take steps to prevent type 2 diabetes. Caregivers and health care professionals of older adults may also find helpful tools to enhance their understanding of issues that affect this population.

Help me find resources for:

**Managing My
Diabetes**

**Preventing Type
2 Diabetes**

**Helping A
Loved One**

**Health Care
Professionals**

Thank you and please do not hesitate to call or email if there are any further questions.
